SUMMARY

AI Engineer who builds and deploys AI-powered applications using machine learning and deep learning models. Develops multi-agent AI systems, scalable backend REST APIs, and end-to-end AI solutions with a strong problem-solving mindset.

WORK EXPERIENCE

The SMM Hub

Jun 2025 – Nov 2025

Mumbai, India

AI Researcher Intern

- Developed **AI Chatbot** for lead tracking, achieving **95% accurate** user data capture.
- Implemented **fintech authentication backend**, achieving **150–200 ms request latency** for **100+ daily users**.
- Built and deployed media generation platform to automate **image and video content creation** for internal teams.
- Delivered **Blog Generation Agent** for the **SEO team**, automating blog drafting workflows.

Godrej Infotech

Oct 2024 – Jan 2025

Mumbai, India

Data Analytics Intern

- Built automated **Power BI dashboards integrating real-time datasets** to track business and marketing performance indicators.
- Generated **analytical reports and visualizations** that improved stakeholder visibility into trends, performance, and operational metrics.

Coincent AI

Jul 2024 – Oct 2024

Mumbai, India

Artificial Intelligence Intern

- Applied **CNN-based models** for **CIFAR-10 classification task**, achieving an **improved F1-score from 0.81 to 0.89** through hyperparameter tuning.
- Explored **Transformer reinforcement learning workflows**, improving model training strategies and reducing convergence time by **30%**.

PROJECTS

YAR Coin

(React.js, Express.js, MongoDB, Python, Ethereum Sepolia, MetaMask, WebSocket)

Live | Code

- Built the complete backend for a **decentralized reputation and reward platform** solving real-world problems for institutions and organizations.
- Integrated **Ethereum Sepolia blockchain**, **MetaMask authentication**, and **smart contract transactions** for secure reward distribution.

People You May Know

(Next.js, FastAPI, Python, MongoDB, XGBoost, Torch, Graph)

Live | Code

- Built a **multi-stage recommendation system** to suggest relevant connections from a graph dataset of **10,000+ user profiles**.
- Implemented pipeline with **XGBoost** and **deep neural network** for ranking candidates, achieving high precision in link prediction.

GuWiki

(Next.js, FastAPI, Python, Torch, Transformers)

Live | Code

- Created a **Gujarati Language Model and Speech Recognition (ASR) system** from scratch using **Gujarati Wikipedia, NEWS and curated text & audio datasets**.
- Designed **data processing pipelines** for collecting, cleaning, and training on Gujarati text and speech corpora.

- Implemented **Wav2Vec2-based speech-to-text pipelines** and **AI-powered knowledge retrieval** for regional language accessibility.

Technical Support SLM

Live | Code

(Llama 3.2, Unsloth, LoRA, Transformers, Hugging Face, TRL)

- Fine-tuned a **technical support chatbot** with **Llama 3.2 (3B)**, using LoRA.
- Implemented end-to-end pipeline, **instruction tuning, model optimization, deployment**, achieving **efficient CPU inference**.

EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science

2023 – 2026

Vidyavardhini’s College of Engineering and Technology, Mumbai University

CGPA: 9.10 / 10.0

Diploma in Computer Engineering

2021 – 2023

Theem College of Engineering, MSBTE

Percentage: 85.3%

TECHNICAL SKILLS

Languages: Python, C++, Bash, SQL

AI/ML: LLM-based Agents, Scalable RAG System, Natural Language Processing (NLP), Automatic Speech Recognition (ASR), Model Fine-tuning, Prompt Engineering

Frameworks & Libraries: PyTorch, Hugging Face Transformers, Scikit-learn, OpenCV, Pandas, NumPy

Databases: MongoDB, Vector Database

MLOps & Tools: Git, GitHub, Docker, Postman, Jupyter Notebook, Google Colab

Soft Skills: Team Leadership (Hackathon), Cross-functional Collaboration, Technical Mentoring

ACHIEVEMENTS

- **Ranked 1st** in the Department of Artificial Intelligence & Data Science.
- **2nd Place** at VNPS’25 - National-Level Project Showcase, VCET Mumbai.
- Developed and Launched **aynlp** on **PyPI**, an open-source NLP utility library with **6,500+ downloads**, enabling developers to solve common NLP tasks efficiently.
- Solved **350+ DSA problems** across competitive programming platforms, achieving a **peak contest rating of 1500+**.
- Earned **14+ badges on Kaggle**, demonstrating hands-on proficiency in data science and machine learning.
- Authored **3+ technical articles** on AI Agents and Reinforcement Learning, published in VCET Techzette.
